# Declaration of Conformity

## FCC Class A

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Warning!** *Any changes or modifications made to the equipment which are not expressly approved by the relevant standards authority could void your authority to operate the equipment.*

## Packing List

Before you begin installing UTC-520, please make sure that the following materials have been shipped:

- UTC-520 series
- Accessories for UTC-520
  - Warranty card
  - DC 12V/ 60W power Adapter
  - Driver CD-ROM disc
  - Mounting kits and packet of screws

If any of these items are missing or damaged, contact your distributor or sales representative immediately.

# Technical Support and Assistance

1. Visit the Advantech web site at <http://support.advantech.com> where you can find the latest information about the product.
2. Contact your distributor, sales representative, or Advantech's customer service center for technical support if you need additional assistance. Please have the following information ready before you call:
  - Product name and serial number
  - Description of your peripheral attachments
  - Description of your software (operating system, version, application software, etc.)
  - A complete description of the problem
  - The exact wording of any error messages

**Warning!** *Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.*

- Warning!**
1. *Input voltage rated 12 V, 5 A*
  2. *Use a 3 V @ 195 mA lithium battery*
  3. *Packing: please carry the unit with both hands, handle with care*
  4. *Maintenance: to properly maintain and clean the surfaces, use only approved products or clean with a dry applicator*
  5. *CompactFlash: Turn off power before inserting or removing CompactFlash storage card.*

## **Contact information:**

Our European representative: Advantech Europe GmbH Kolberger StraÙe 7  
D-40599 Düsseldorf, Germany

Fax: 49-211-97477300

# Safety Instructions

1. Read these safety instructions carefully.
2. Keep this User Manual for later reference.
3. Disconnect this equipment from any AC outlet before cleaning. Use a damp cloth. Do not use liquid or spray detergents for cleaning.
4. For plug-in equipment, the power outlet socket must be located near the equipment and must be easily accessible.
5. Keep this equipment away from humidity.
6. Put this equipment on a reliable surface during installation. Dropping it or letting it fall may cause damage.
7. The openings on the enclosure are for air convection. Protect the equipment from overheating. **DO NOT COVER THE OPENINGS.**
8. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
10. All cautions and warnings on the equipment should be noted.
11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.
12. Never pour any liquid into an opening. This may cause fire or electrical shock.
13. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.
14. If one of the following situations arises, get the equipment checked by service personnel:
  15. The power cord or plug is damaged.
  16. Liquid has penetrated into the equipment.
  17. The equipment has been exposed to moisture.
  18. The equipment does not work well, or you cannot get it to work according to the user's manual.
  19. The equipment has been dropped and damaged.
  20. The equipment has obvious signs of breakage.
21. **DO NOT LEAVE THIS EQUIPMENT IN AN ENVIRONMENT WHERE THE STORAGE TEMPERATURE MAY GO BELOW -20° C (-4° F) OR ABOVE 60° C (140° F). THIS COULD DAMAGE THE EQUIPMENT. THE EQUIPMENT SHOULD BE IN A CONTROLLED ENVIRONMENT.**
22. **CAUTION: DANGER OF EXPLOSION IF BATTERY IS INCORRECTLY REPLACED. REPLACE ONLY WITH THE SAME OR EQUIVALENT TYPE RECOMMENDED BY THE MANUFACTURER, DISCARD USED BATTERIES ACCORDING TO THE MANUFACTURER'S INSTRUCTIONS.**
23. The sound pressure level at the operator's position according to IEC 704-1:1982 is no more than 70 dB (A).

**DISCLAIMER:** This set of instructions is given according to IEC 704-1. Advantech disclaims all responsibility for the accuracy of any statements contained herein.

# Chapter 1

## General Information

This chapter gives background information on the UTC-520.

Sections include:

- Introduction
- General Specifications
- LCD Specifications
- Dimensions

## 1.1 Introduction

The UTC-520 is an Intel low-power Intel® Atom™ D510 processor computer that is designed to serve as a interactive self-service terminal and as a multimedia computer. It is a PC-based system with 21.5" TFT LCD display, on-board PCI-e Ethernet controller, one COM port and VGA connector. With a built in internal IDE connector (for CF card), One SATA connector for HDD and an mini PCIe expansion socket, the UTC-520 is as compact and user friendly as a multifunction computer. In addition, its "fit anywhere" design makes it very flexible and able to be used in many different kinds of installations. It can be wall mounted or stood upright on a desktop.

For system integrators, this simple, complete, compact and highly integrated multimedia system lets you easily build a UTC-520 into your applications. Common industrial applications include self transaction & healthcare, information kiosk & interactive signage. Our UTC-520 is a reliable, cost-effective solution to your application's processing requirements.

## 1.2 General Specifications

### 1.2.1 General

- **Dimensions (W x H x D):** 516 x 313 x 40 mm
- **Weight:** 6 kg
- **Power supply:** ATX type Input Voltage: +12 V<sub>DC</sub>, 5A
- **Power adaptor:** AC/DC (Standard Build in)  
Input voltage: 100 ~ 240 V<sub>AC</sub>  
Output voltage: 12 V @ 5 A
- **Disk drive housing:** Space for one 2.5" SATA HDD
- **Front panel:** IP54/NEMA4 compliant

### 1.2.2 Standard PC functions

- **CPU:** On board Intel® Atom™ D510 1.6 GHz with 512KB x 2 L2 cache
- **BIOS:** AMI 16 Mbit flash BIOS
- **System Chipset:** Intel® Atom™ D510 + Intel ICH8M
- **2nd level cache:** 512 KB x 2
- **System Memory:** One 200-pin SO-DIMM socket, accepting up to 2GB DDR2 667 (doesn't support DDR2 533MHz Memory) Function
- **Serial ports:** 1\* external COM
- **Universal serial bus (USB) port:** Support Up to 2 USB V2.0
- **Mini PCI-E bus expansion slot:** Accepts one mini PCI-E device(Wire less LAN card)
- **Solid State Disk:** Supports CompactFlash card type I/II (True IDE mode)
- **Watchdog timer:** Single chip Watchdog 255-level interval timer, setup by software
- **Power management:** Full ACPI (Advanced Configuration and Power Interface) 2.0 Supports S0, S1, S3, S4, S5

### 1.2.3 VGA Interface

- **Chipset:** The GPU Contains a refresh of the third generation graphics core
- **Memory Size:** Up to 224 MB of dynamic video memory allocation
- **Interface:** VGA

- **Display mode:**
  - CRT: Analog RGB display output resolution up to 2048\*1536 @ 60 Hz

### 1.2.4 Audio function

- **Audio:** High Definition Audio (HD), 3 W x 2 Speakers

### 1.2.5 LAN Function

- **Chipset:** LAN1 Intel 82567, LAN2 Intel 82583V
- **Speed:** 1000 Mbps /Interface: 2 x RJ45
- **Wake-on-LAN:** Supports Wake-on-LAN function with ATX power control

### 1.2.6 Touch screen (Optional)

Type	Analog Resistive 5 wires
Resolution	Continuous
Light Transmission	80%
Controller	USB interface
Power Consumption	<5 V @ 60 mA
Software Driver	Supports Windows XP/ 7/ XPE
Durability(touches in a lifetime)	36 million

### 1.2.7 Optional modules

- **Memory:** One 200-pin SO-DIMM socket, accepting up to 2 GB DDR2 667
- **HDD:** 2.5" SATA HDD
- **SSD:** Supports CompactFlash® Card TYPE I/II
- **Operating System:** Windows XP, Vista, 7
- **Touchscreen:** Analog resistive (UTC-520-RE)
- **Power cord:** 1702002600 ( US) 1702002605 (Europe)

### 1.2.8 Environment

- **Operating Temperature:** 0 ~ 40° C (32 ~ 104° F)
- **Storage Temperature:** -20 ~ 60° C
- **Relative humidity:** 10 ~ 95% @ 40° C (non-condensing)
- **Shock:** 10 G peak acceleration (11 ms duration)
- **Certification:** EMC: CE, FCC, BSMI, VCCI.  
Safety: UL 60950, CB, CCC, BSMI
- **Vibration:** 5 ~ 500 Hz 0.5 G RMS Random vibration

## 1.3 LCD Specifications

- **Display type:** 21.5" TFT LCD
- **Max. resolution:** 1366 x 768 (Default setting is 1366 x768m,scalar board allows resolution up to Full HD)
- **Colors:** 16.7 M
- **Dot size (mm):** 248.25(H) X 248.25 ( V)
- **Viewing angle:** 170 ° / 160°

- **Luminance:** 400 cd/m<sup>2</sup>
- **\*VR control:** Brightness could be modified through BIOS

**Note!** *The color LCD display installed in the UTC-520 is high-quality and reliable. However, it may contain a few defective pixels which do not always illuminate. With current technology, it is impossible to completely eliminate defective pixels. Advantech is actively working to improve this technology.*

## 1.4 Dimensions

Figure 1.1 Dimensions of UTC-520

# Chapter 2

## System Setup

This chapter details system setup on the UTC-520.

Sections include:

- A Quick Tour of the UTC-520
- Installation procedures
- Running the BIOS Setup Program
- Installing System Software

---

## 2.1 A Quick Tour of the UTC-520

Before you start to set up the UTC-520, take a moment to become familiar with the locations and purposes of the controls, drives, connectors and ports, which are illustrated in the figures below.

When you place the UTC-520 upright on the desktop, its front panel appears as shown in Figure 2.1.

**Figure 2.1 Front view of UTC-520**

When you turn the UTC-520 around and look at its rear cover, you will find the I/O section as shown in Fig. 2.2. (The I/O section includes various I/O ports, including serial ports, Ethernet ports, USB ports, the VGA, and Compact Flash slot so on.) The Compact Flash slot is at the bottom of the UTC-520.

**Figure 2.2 Rear view of UTC-520**

A. Antenna connector

B. USB 2.0 x 2

C. Gigabit LAN x 2

D. COM port

E. VGA

F. DC Inlet

G. Power Switch

H. Compact Flash slot

## 2.2 Installation Procedures

### 2.2.1 Connecting the power cord

The UTC-520 can be powered by a DC electrical outlet. Be sure to always handle the power cords by holding the plug ends only. Please follow the Figure 2.5 to connect the male plug of the power cord to the DC inlet of the UTC-520.

**Warning!** Failure to plug the green power adapter jack into the UTC-520 first, BEFORE turning on power will result in damage to the motherboard.

### 2.2.2 Connecting the keyboard or mouse

Before you start the computer, please connect keyboard port on the I/O section of the UTC-520.

### 2.2.3 Switching on the power

When you look at the rear side of the UTC-520, you will see the power switch as shown in Figure 2.2.

**Figure 2.3 Connect the power cord to the DC inlet**

## 2.3 Running the BIOS Setup Program

Your UTC-520 is likely to have been properly set up and configured by your dealer prior to delivery. You may still find it necessary to use the UTC-520's BIOS (Basic Input-Output System) setup program to change system configuration information, such as the current date and time or your type of hard drive. The setup program is stored in read-only memory (ROM). It can be accessed either when you turn on or reset the UTC-520, by pressing the "Del" key on your keyboard immediately after powering on the computer.

The settings you specify with the setup program are recorded in a special area of memory called CMOS RAM. This memory is backed up by a battery so that it will not be erased when you turn off or reset the system. Whenever you turn on the power, the system reads the settings stored in CMOS RAM and compares them to the equipment check conducted during the power on self-test (POST). If an error occurs, an error message will be displayed on screen, and you will be prompted to run the setup program.

## 2.4 Installing System Software

Recent releases of operating systems from major vendors include setup programs which load automatically and guide you through hard disk preparation and operating system installation. The guidelines below will help you determine the steps necessary to install your operating system on the UTC-520 hard drive.

**Note!** *software prior to shipment of your UTC-520. Some distributors and system integrators may have already pre-installed system software prior to shipment of your UTC-520.*

Installing software requires an installed HDD. Software can be loaded in the UTC-520 using any of four methods:

### 2.4.1 Method 1: Use the Ethernet

You can use the Ethernet port to download software to the HDD.

### 2.4.2 Method 2: Use an external USB CD-ROM

If required, insert your operating system's installation or setup diskette into the diskette drive until the release button pops out.

The BIOS of the UTC-520 supports system boot-up directly from the CD-ROM drive. You may also insert your system installation CD-ROM into the CD-ROM drive.

Power on your UTC-520 or reset the system by pressing the "Ctrl+Alt+Del" keys simultaneously. The UTC-520 will automatically load the operating system from the diskette or CD-ROM.

If you are presented with the opening screen of a setup or installation program, follow the instructions on screen. The setup program will guide you through preparation of your hard drive, and installation of the operating system. If you are presented with an operating system command prompt, such as A:\>, then you must partition and format your hard drive, and manually copy the operating system files to it. Refer to your operating system user manual for instructions on partitioning and formatting a hard drive.

## 2.5 Installing the Drivers

After installing your system software, you will be able to set up the Ethernet, XGA, audio, and touchscreen functions. All drivers are stored in a CD-ROM disc entitled "Drivers and Utilities" which can be found in your accessory box.

The various drivers and utilities in the CD-ROM disc have their own text files which help users install the drivers and understand their functions. These files are a very useful supplement to the information in this manual.

**Note!** *The drivers and utilities used for the UTC-520 are subject to change without notice.*

*If in doubt, check Advantech's website or contact our application engineers for the latest information regarding drivers and utilities.*

# Chapter 3

## Hardware Installation and Upgrading

This chapter details installing the UTC-520 hardware.

Sections include:

- Overview of Hardware Installation and Upgrading
- Installing the 2.5" Hard Disk Drive (HDD)
- Installing the Compact Flash

---

## 3.1 Introduction

The UTC-520 consists of a PC-based computer that is housed in a Aluminum extrusion. You can install a HDD, DRAM, and Compact Flash by removing the rear cover. Any maintenance or hardware upgrades can be easily completed after removing the rear cover.

**Warning!** *Do not remove the rear cover until you have verified that no power is flowing within the UTC-520. Power must be switched off and the power cord must be unplugged. Every time you service the UTC-520, you should be aware of this.*

## 3.2 Installing the 2.5" Hard Disk Drive (HDD)

You can attach one Serial Advanced Technology Attachment (SATA) hard disk drive to the UTC-520's internal controller. The SATA controller supports faster data transfer and allows the SATA hard drive to exceed 150MB. The following are instructions for installation:

1. Detach and remove the rear cover.
2. Place the HDD in the metal bracket, and tighten the screws (see Figure 3.1).
3. The HDD cable (SATA 7P+1\*5P-2.5/SATA(15+7)P) is next to the metal brace. Connect the HDD cable to the motherboard (CN3/CN5). Plug the other end of the cable into the SATA hard drive.
4. Put the rear cover on and tighten the screws.

**Figure 3.1 Installing primary 2.5" HDD**

### 3.3 Installing the Compact Flash card

1. Please follow the fig. assembling the Compact Flash card.  
(Please notice the direction of the CF Card)

**Figure 3.2 Installing the Compact Flash card**

# Chapter 4

## Jumper Settings and Connectors

This chapter tells how to set up the UTC-520 hardware, including instructions on setting jumpers and connecting peripherals, switches and indicators. Be sure to read all the safety precautions before you begin the installation procedures.

Sections include:

- Jumpers and Connectors
- CMOS Clear for External RTC (J5)
- COM Port Interface
- VGA Interface
- Watchdog Timer Configuration

## 4.1 Jumpers and Connectors

### 4.1.1 Setting jumpers

You can configure your UTC-520 to match the needs of your application by setting jumpers. A jumper is the simplest kind of electrical switch. It consists of two metal pins and a small metal clip (often protected by a plastic cover) that slides over the pins to connect them. To 'close' a jumper, you connect the pins with the clip. To 'open' a jumper you remove the clip. Sometimes a jumper will have three pins, labeled 1, 2, and 3. In this case, you would connect either pins 1 and 2 or pins 2 and 3.

The jumper settings are schematically depicted in this manual as follows:.

A pair of needle-nose pliers may be helpful when working with jumpers.

If you have any doubts about the best hardware configuration for your application, contact your local distributor or sales representative before you make any changes.

### 4.1.2 Jumpers and connectors

The motherboard of the UTC-520 has a number of jumpers and connectors that allow you to configure your system to suit your applications. The table below lists the function of each of the board's jumpers.

**Table 4.1: Jumpers and Connector functions**

CN1	Audio
